As a dedicated and ambitious student with a profound interest in the field of web development, I am actively pursuing opportunities to leverage my skills and enthusiasm in this industry. With a demonstrated aptitude for fast-paced learning, I am committed to staying abreast of emerging technologies and industry trends. I possess a proactive and resolute mindset, consistently striving to tackle challenges head-on and deliver impactful solutions.

EDUCATION

B.E in Information Technology
A.C Patil College of Engineering

12/2021 - 06/2024   *Pursuing*

Diploma in Information Technology
Thakur Polytechnic

06/2018 - 06/2021   *90.31%*

PERSONAL PROJECTS

HeavenWalls - Wallpaper Application
- **ReactJs, Axios, ChakraUI, ExpressJS, WallHaven API**
- Developed a dynamic wallpaper application using React, showcasing my proficiency in front-end technologies.
- Leveraged a custom proxy API to fetch high-quality wallpapers from the Wallhaven API, addressing CORS (Cross-Origin Resource Sharing) limitations. Demonstrated strong JavaScript and CSS skills to create an interactive and responsive design.
- This project highlights my ability to overcome technical challenges and deliver a visually appealing and user-friendly web application.
- https://github.com/xtremeandroid/HeavenWalls-WallPaperApp

AyuFlix - Simple Movie Website
- **ReactJS, Styled Components, Axios, TMDB API**
- Demonstrated proficiency in React and API integration by developing a user-friendly movie search application. Leveraged React to create an intuitive user interface with a clean and minimalistic design.
- Integrated the TMDB API to retrieve movie data, displaying results in an organized grid format with movie details and poster thumbnails.
- Highlighted abilities in problem-solving, user interface design, and efficient data retrieval. This project exemplifies my expertise in React development, API integration, and creating engaging web applications.
- https://github.com/xtremeandroid/ayuflix

Disney+ Frontend Clone
- **ReactJS, Redux, Firebase, Styled Components**
- Developed a Disney+ clone project, replicating the functionality and design of the popular streaming service.
- Built using modern web technologies including React, Redux, and Firebase, showcasing proficiency in front-end development, state management, and cloud integration.
- Leveraged Redux for efficient state management and Firebase for seamless data storage and retrieval. This project demonstrates strong skills in React development, Redux implementation, and integration with cloud services, delivering a visually appealing and functional streaming platform.
